

**Treant General Contractors Limited**

## Plumbing Services

Treant General Contractors Limited TGCLs full-service plumbing team handles all your plumbing needs—from emergency repairs to major renovations—from small installations to large industrial or commercial installations to multi-family installations.

- Sanitary Systems: From sewer line repairs and installation to toilet bowl replacements, our expertly trained technicians ensure your sanitary systems stay in proper working order. We know that only thoroughly comprehensive sanitary maintenance is acceptable for the continued health and well-being of our customers.
- Potable Water Systems: Stay healthy with clean household and commercial drinking water! There should be no exceptions. Whether it's your family, your employees, or your customers, providing safe and fresh drinking water is the only way to go.
- Water Heaters: We can repair or install a variety of conventional, tankless, and indirect water heaters depending on the needs and challenges of your particular home or business.

## Plumbing Services

- Pipe Repair: Pipes inevitably break down over time. Our expert plumbers can repair or replace any piping for long-lasting durability.
- Backflow Devices: Make sure your water is safe and not cross-contaminated with a non-potable source. We are certified in backflow prevention installations.
- Drain Cleaning: We take drain cleaning to another level with industry-leading equipment.
